

# Java program to print whether a number it is positive or negative

```
public class Posneg
{
    public static void main(String[] args)
    {
        int number=-20;
        if(number > 0)
        {
```

```
System.out.println(number+" is a positive
number");
```

```
        }
        else if(number < 0)
        {
```

```
System.out.println(number+" is a negative
number");
```

```
        }
```

```
else
```

```
{
```

```
System.out.println(number+" is neither  
positive nor negative");
```

```
}
```

```
}
```

```
}
```

Output:-

-20 is a negative number
