Java program to print the area and perimeter of a circle

(radius=7.5)

```java
public class Radius
   {
  private static final double radius = 7.5;
  public static void main(String[] args)
     {
     double perimeter = 2 * Math.PI * radius;
     double area = Math.PI * radius * radius;
     System.out.println("Perimeter is = " +
perimeter);
     System.out.println("Area is = " + area);
     }
   }
```

Output:-

Perimeter is = 47.12388980384689
Area is = 176.71458676442586
